-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

The drawing is objected to under 37CFR1.83 and 1.84(p)(5) as failing to contain every feature in the claims and every numeral in the drawing. For examples, note the rod in claim 7 is not in the drawing and numeral 22 in the disclosure and numeral 16 in claim 7 are not in the drawing. The drawing and disclosure should be amended to assure these types of omissions are eliminated. The introduction of new matter should be guarded against.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 7 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification fails to disclose the visual system in claim 7. Thus it is unclear how this system is constructed. Particularly how the rod is constructed and connected to the fixing means.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, "said" should be inserted before "rigid" in lines 24 and 25 to correlate these "hooks" with the hooks in line 23 to avoid indefiniteness.

Regarding claim 2, the "sloping guiding surfaces" should be correlated with "the first and/or second inclined surface portions" in claim 1 to avoid indefiniteness.

Regarding claim 3, "first inclined surface portions" and "converging second inclined surface portions" should be positively correlated with "first inclined surface portions" and "converging second inclined surfaces" in claim 1.

Regarding claim 7, some of the elements have no basis in the original specification, especially the rod, and is thus indefinite.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by EPO 1156161 A2.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over EPO 1156161 A2 in view of EPO 0609176 A1.

It would have been obvious to provide sloping walls and blocks in EPO 1156161 A2 to enhance coupling in view of EPO 0609176 A1 (figures 1 and 2).
